Adobe Photoshop Adobe Photoshop is a professional digital imaging and graphics software application developed by Adobe Systems that employs a raster graphics format. Adobe Photoshop is commonly known as the market leader, especially in the digital imaging industry, though several software packages built on its code base, such as Photoshop Elements, Office Suite, and Adobe Bridge, have gained some traction.

With a focus on digital photography, the main features of Adobe Photoshop include the ability to edit, retouch, color correct, and print digital photographs. It also includes the ability to export images in a variety of formats, including high-quality JPEGs, that can then be distributed as images online or printed. In addition, Photoshop can convert or enhance images captured by digital cameras. In the years leading up to the launch of Photoshop and the introduction of the Macintosh, Adobe was the dominant force in the field of computer-based graphics, with products such as MacroSketch, Encore, and PhotoPaint. With Photoshop, Adobe became the dominant force in the field of digital imaging. However, the version numbering of Photoshop did not advance in accordance with the technological advances in hardware. For example, the original release of Photoshop numbered 8 and then 9, whereas the final release of Adobe Photoshop CS was numbered 10. Less commonly used, but still in use, is Adobe's Cross Media Studio (CMS), a suite that combines Adobe Flash animation

with Adobe Photoshop. Because of this, the former was sometimes derogatorily referred to as "Adobe Photoshop Lightroom". In May 2009, Adobe changed its strategy regarding Photoshop. Instead of releasing a new flagship version to replace Photoshop CS6, the company decided to introduce two new releases. Both plans caused speculation in the news media about the death of Photoshop and the future of Adobe's other products, such as Macromedia Flash, Premiere Pro, or Encore. On February 9, 2010, Adobe released Photoshop Elements 10.0.1 for Mac. The 10.0.1 release introduced the update "Mac OS X 10.7 Lion compatibility" which required a reboot and you have to sign in with your Apple ID to sign into this version of Photoshop Elements. On May 28, 2010, Adobe released Photoshop Creative Cloud, a subscription service which allows the user to borrow images from an Adobe library of images called the Creative Cloud library. Photoshop Elements can open and edit images in the Creative Cloud library, and Photoshop Creative Cloud costs

The media has been reporting about the increasing number of people that have not only been buried in al-Atra Cemetery in Jableh (Jerba), but also in al-Haffa Cemetery of Laayoune (Western Sahara) and in the section of Brawij in Mahdia (Tunisia). The French newspaper Le Monde published a July 6, 2015 article that expressed these thoughts. “All this shows the deterioration of the state of affairs of several Sahrawi families who, for more than thirty years, have been living in exile.” It is unfortunate that some organizations are supporting the illegal occupation of the territory. The confusion continues over the meaning of the word “settlement.” Do the Arabic-language articles mean that the refugees are settled in either of the two cemeteries? Or do they refer to the number of refugees? Or do they mean that only some refugees are settled in the cemeteries? In other words, what is the meaning of “settled” in

the article? The other articles by Le Monde, La Depeche, La Dépêche, Le Figaro, Le Point, and ABC refer to the condition of the cemeteries, the need to establish their identity as an act of sovereignty, and the real number of refugees and Sahrawis in the cemeteries. All these articles, except for ABC, mention the sections of Laayoune and Brawij, and they emphasize that some of the refugees, who have been living in the cemeteries since the 1960s, may end up migrating to al-Atra Cemetery in Jableh (Jerba), based on the difference in conditions between the two cemeteries. It seems that the goal of the articles is to show the deterioration of the situation for many refugees who are in the cemeteries. The newspaper Le Monde gives the following definition of “settlement” in the following excerpt from the article: “The settlement of a refugee in a territory, or settlement of the refugees in these territories, is an act of sovereignty that places them in a local environment, which becomes their new home.” However, the term “settlement” used in that statement seems to refer to the number of refugees

in a cemetery: “The settlement of the refugees in these territories. ◆
